## Part Number Ordering

Many GSA Global Supply catalogs feature items with National Stock Numbers (NSNs) and others with GSA part numbers. FEDSTRIP/MILSTRIP customers can order GSA part-numbered items by using one of the following identifiers:

- AOB: For domestic shipment
- AO2: For overseas shipment

Both NSNs and GSA part-numbered items carry the same customer benefits. All are FAR-compliant and AbilityOne Guaranteed. All can be shipped anywhere on the globe. All are backed by GSA Global Supply customer service.

## DOD EMALL

Global Supply items appear on the DOD EMALL site. Customers must use their AAC/DoDAAC to purchase.

# Customer Focused. Solutions Driven.

## Multiple Award Schedules

The GSA Multiple Award Schedules (MAS) program links Federal buyers and other authorized entities to over 12 million mission-supporting products and services. Customers can access the full range of products and services through GSA Advantage!® ([www.gsaadvantage.gov](http://www.gsaadvantage.gov)), a reliable one-stop resource designed to meet federal acquisition needs. Under the MAS program, GSA has negotiated and established contracts, inclusive of pricing and other terms and conditions, with a multitude of vendors. Customers are free to make a best value determination and utilize these contracts by researching information available online (product/service attributes, pricing, vendor contact information, other terms and conditions, etc.), communicating with vendors as appropriate, and placing orders directly with vendors.

The streamlined acquisition approach and availability of information offered by the MAS program is particularly beneficial to disaster relief and response efforts. In fact, a special "Disaster Relief" section on the GSA Advantage!® web site helps customers identify a variety of critical products and services commonly used in disaster preparedness and relief efforts. Examples of items accessible from the "Disaster Relief" section include medical supplies, cooking and food supplies, electronic/power equipment, cleaning supplies, temporary housing and shelter, personal safety and protection items, communication solutions, construction services and vehicle leasing. With just a few clicks and a phone call, customers can prepare for and respond to disasters efficiently and effectively.

## State and Local Customers

Section 833 Disaster Recovery of the Defense Authorization Act for FY 2007 amended 40 U.S.C. 502 to authorize GSA to provide state and local governments the use of Federal Supply Schedules for purchase of products and services to be used to facilitate recovery from a major disaster, terrorism or nuclear, biological, chemical or radiological attack.

This Disaster Recovery Purchasing authority is limited to GSA's Multiple Award Schedule contracts and does not include any other GSA programs. A listing of the Federal Supply Schedules is available in GSA's Schedules e-library at [www.gsa.gov/elibrary](http://www.gsa.gov/elibrary).

State and local governments may use the Federal Supply Schedule contracts to purchase products and services in advance of a major disaster declared by the President as well as in the aftermath of an emergency event. State and local governments are responsible for ensuring that the products or services purchased are to be used to facilitate recovery.

The use of Schedules for Disaster Recovery is non-mandatory for both state and local governments and Schedule contractors. Businesses have the option of deciding whether to accept orders placed by state or local government buyers. State and local governments have full discretion to decide if they wish to make a Federal Supply Schedule purchase, subject to any limitations that may be established under state and local law and procedures.

For the latest GSA Multiple Award Schedules and contract-award information, visit our GSA Multiple Award Schedules e-Library at [www.gsa.gov/elibrary](http://www.gsa.gov/elibrary)

## Lightstick (Chemlight)

Chemical lights, commonly known as chemlights, are a non-toxic, non-flammable source of light. These lightsticks are good for emergency, safety and signaling uses. They provide safe, effective light without heat, sparks or flame. To activate, a user bends the plastic lightstick, breaking the inner glass vial. Chemicals from the broken glass vial mix with chemicals from the plastic tube to deliver a light-creating chemical reaction. Self-contained, compact, rugged, and waterproof.

## GSA Makes it Easy

### Requisition

GSA Global Supply provides fast, easy access to tens of thousands of products including, but not limited to, computer hardware and applications, office supplies, furniture and furnishings, housewares and cleaning equipment, industrial supplies, safety products, tools and hardware, wildland fire items, “green” items and products that support disaster relief efforts. When ordering from GSA Global Supply, you are submitting a simple requisition for product fulfillment, not conducting a procurement, which means you don’t have to send your requirement to multiple sources for comparison shopping.

While we aim to provide a wide variety of products, we recognize that we may not carry every item you need. That’s why you’ll see small notes throughout this catalog pointing you toward Multiple Award Schedule contracts that may help you find additional products or services from GSA.

### Using GSA Schedule Contracts

If necessary you can order products directly from thousands of pre-qualified vendors through GSA’s Multiple Award Schedules (MAS) Program. Under this purchasing method, GSA establishes long-term government-wide contracts with vendors to provide customers with access to more than 12 million state-of-the-art, high-quality commercial supplies at volume discount pricing. Here, customers place orders directly with GSA MAS contractors or through *GSA Advantage!*<sup>®</sup>, GSA’s online shopping and ordering system.

### Personal Property Management

At the end of a product’s lifecycle, you may face the need to dispose of excess government-owned personal property that is designated as surplus.

GSA makes it easy to report, search and select excess property through *GSAXcess*<sup>®</sup>, our web-enabled platform that allows authorized government users to post excess product reports. *GSAXcess*<sup>®</sup> organizes products into user friendly groups so search and selection is click-through convenient. You can look at product by state/territory too, or find out if excess product is available for transfer or donation. We can also provide guidance on how to handle gifts from the public or foreign entities as well as property requiring special handling such as controlled substances, demilitarized equipment, firearms and more at [www.gsa.gov/gsaxcess](http://www.gsa.gov/gsaxcess).
