

Security Solutions Converge

Total Integrated Solution Begins with GSA at
www.gsa.gov/securitysolutions

Acquisitions that Combine the Offerings of Several GSA Multiple Award Schedules

Security Convergence

Security convergence is the comprehensive approach that better enables monitoring, pre-emption, detection, preparation, prevention, protection, management, control, response and recovery from physical and cyber attacks against the government, its citizen's vital private sector resources, and critical infrastructures. Support of the complete security requirement includes providing products and services addressing needs throughout the complete security framework: threat assessment and intelligence, deterrence, protection, recovery and remediation.

The integration of physical, personal, and data security systems requires federal agencies to seek new, innovative and interoperable solutions utilizing existing procurement tools, including GSA Multiple Award Schedules (MAS).

GSA MAS can provide solutions for many complex security needs. As the commercial marketplace evolves, GSA works to assist its customers obtain the integrated state-of-the-art solutions needed.

Introduction to Converged Ordering

The GSA MAS program can effectively support security convergence efforts with products and services either on a single Schedule, or across Schedules. MAS contractors can provide total solutions for complex, cross-Schedule procurements. GSA's goal is to provide the information and training, in conjunction with industry knowledge to enable the customer agency to obtain the needed services and products from the existing Multiple Award Schedules. **The home base for this effort can be found at gsa.gov/securitysolutions.**

Converged Security Solutions

Single Vendors with Multiple Contract Solutions

GSA Multiple Award Schedules allow customers the flexibility to mix-and-match Schedules to provide comprehensive integrated security solutions. Many vendors hold several Schedule contracts, allowing them to provide quotes for complex cross-Schedule procurements. Most contractors can also help analyze your security requirements to recommend appropriate solutions.

Contractor Team Arrangements

Contractor Team Arrangements (CTAs) are one of the most useful tools available to provide comprehensive cross-Schedule solutions. Otherwise vendors need to have several Multiple Award Schedule contracts, sometimes in different disciplines, to be able to provide converged solutions that cross different Multiple Award Schedules. CTAs allow vendors to create their own partnerships and to provide comprehensive solutions beyond the scope of their individual contracts.

Blanket Purchase Agreements

Blanket Purchase Agreements (BPAs) eliminate contracting and open-market costs, such as the search for sources, development of technical documents and solicitations, and evaluation of offers. A BPA may further decrease costs, reduce paperwork and save time by eliminating the need for repetitive, individual purchases from Schedule contracts or Contractor Teams.

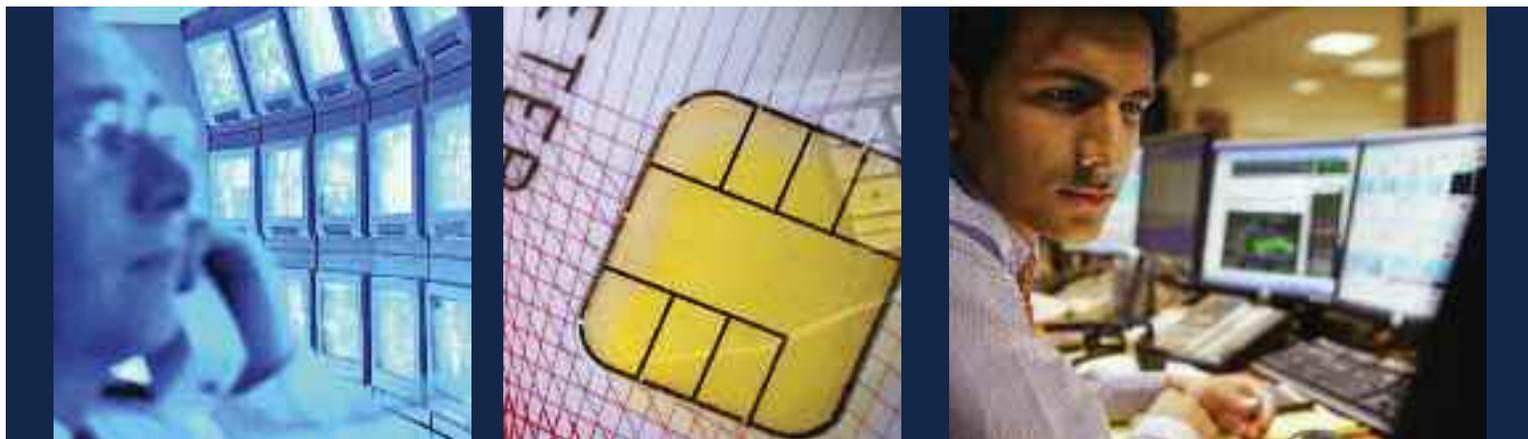

The following chart acts as a reference guide detailing MAS offerings and their respective Special Item Numbers (SINs) related to the six security areas identified on the front of this publication. Each “X” indicates that those products and/or services are available through the applicable MAS and SIN.

Schedule Number	SIN	Schedule Name • SIN Title	Security Areas					
			Identity Management	Safeguarding Information	Compliance Support	Physical Security	Security Systems	IT Products and Services
36								
	47 147	Security Applications For Business Machines	X	X				
	51 507	Destruction Services		X			X	
	51 508	Litigation Support Services			X			
	51 509	Network Connectivity Support Services					X	X
	733 6	Mail Screening and Inspection Services			X			
520								
	520 16	Business Information Services		X	X		X	
	520 17	Risk Assessment and Mitigation Services	X	X	X		X	
	520 18	Independent Risk Analysis	X	X	X		X	
	520 19	Data Breach Analysis		X				
	520 20	Comprehensive Protection Solutions	X	X			X	
	361 50	Lease/Rental of Pre-Engineered/Prefabricated Buildings and Structures					X	
	361 99a	Introduction of New Services and Products Related to Pre-Engineered and Prefabricated Buildings and Structures					X	
	383 2	Portable, Standby Backup, or Prime Generator(s)					X	
	412 14	Uninterruptible Power Supplies						X
	412 15	Power Distribution Units					X	
	563 16	Security Film, Blast Mitigation, Bullet Resistant, and Glass Fragmentation Products for Doors, Windows, and Walls					X	
66								
	627 50	Unmanned Aerial Vehicles (UAV) Systems, Airborne Segment, Ground Control Segment, and Critical Components				X		
	627 57	Unmanned Terrestrial Vehicle Systems and Control Segments				X		
	66 122	Video Image Analyzers and Analysis Systems	X			X		
70								
	132 32	Term Software License	X	X		X	X	X
	132 33	Perpetual Software License	X	X		X	X	X
	132 34	Maintenance of Software	X	X		X	X	X
	132 50	Classroom Training	X	X		X	X	X
	132 51	Information Technology Services	X	X		X	X	X
	132 52	Electronic Commerce Services				X	X	X
	132 53	Wireless Services	X	X		X	X	X
	132 60	Access Certificates for Electronic Services (ACES) Program	X		X		X	X
	132 61	Public Key Infrastructure (PKI) Shared Service Providers (PKI SSP) Program			X	X	X	X
	132 62	Homeland Security Presidential Directive 12 (HSPD-12) Product and Service Components	X	X	X	X	X	X
	132 8	Purchase of Equipment	X	X		X	X	X
	132 12	Maintenance of Equipment, Repair Services and/or Repair/Spare Parts			X		X	
71 III E								
	489 103	Interior Components		X				
	489 154	Vault Door Accessories		X				
	489 161	Special Access Control Container		X				
	489 166	Safe, Burglary Resistant		X				
738 X								
	595 21	Human Resource Services (Excluding EEO Services)	X					
	595 27	Pre-Employment Background Investigations	X

Products and Services Already in GSA MAS Program

The GSA MAS program is the largest and most comprehensive acquisition vehicle available to the federal government. MAS contracts offer complete, state-of-the-industry products and services to meet physical and cyber requirements. The contracts also address the interoperability requirements of Homeland Security Presidential Directive 12 (HSPD-12) and the related Federal Information Processing Standard (FIPS) 201 Evaluation Program for products and services.

Listed below are six cross-Schedule groupings to help determine the products and/or services that meet your needs.

- **Identity Management** Identify a person and his or her level of authorized access to facilities and systems.
- **Safeguarding Information** Protect electronic information from unwanted access.
- **Compliance Support** Access to solutions that offer services aiding in developing business processes and achieving and maintaining regulatory compliance.
- **Physical Security** Physical or protective measures designed to safeguard personnel, facilities, national borders, and critical infrastructure.
- **Security Systems** Support for all phases of security system operation including design, assessment, and remediation.
- **IT Services and Products** IT products, services, and solutions are available to support the technology backbone of your security needs.

Please see the inside of this publication for an informative chart that provides further details about these offerings.

Additional Information

The home base for information on security solutions is www.gsa.gov/securitysolutions. This site contains links to external resources and regulations, frequently asked questions, and a cross-referenced listings of GSA MAS Special Item Numbers (SINs) by security area.

GSA invites questions to one of our security solution contracting experts at securitysolutions@gsa.gov. This assistance is free and can provide additional information on contracting options or fee-based assisted services.

GSA Security Solutions can also be reached at 703-605-2727. An online version of this document is available at gsa.gov/securitysolutions on the Educational Resources page. It contains hyperlinks to vendor information, contract terms and conditions and price and labor rate ceilings.
