

Effective with the retirement of the GBL form for domestic shipments on March 31, 2002, Federal agencies will be required to develop a unique numbering system which must be approved by GSA Audits Division for their transportation needs. Another option for an agency is to obtain blocks of preset numbers from the Forms Center in Fort Worth, TX at no cost. To request a block of numbers, please contact Ms. Fleming on (817) 978-2508. For those agencies that have excess GBL forms on hand, agencies may use the number off of the GBL form. Numbers from the Forms Center or those taken off of GBL forms are still protected and must be accounted for by the agency.
