

## **ATTENTION**

### **Users/Vendors of GSA's "Freight Management Program" (FMP) or GSA's "Centralized Household Goods Traffic Management Program" (CHAMP)**

Effective November 1, 2001, GSA is converting (with certain exceptions described in notice posted on this Website on 7-27-01) to the use of ALK Technologies, Inc. 5-digit ZIP Code mileage for use in determining highway miles for all surface freight and household goods shipments between any two locations within the contiguous United States (i.e., the 48 States and the District of Columbia). We have incorporated the ALK mileage into our automated Interagency Transportation Management System (ITMS), and effective November 1<sup>st</sup> transportation charges on all cost comparisons issued under ITMS automatically will be computed based on ALK mileage.

Since announcing this conversion, we have received a number of requests for information on how to purchase the ALK automated mileage. To purchase a copy of ALK PC Miler Version 15 (coincides with PC\* Miler 15) mileage software, please contact:

**ALK Technologies, Inc.  
ATTN: PC\*Miler Sales  
1000 Herrontown Road  
Princeton, NJ 08540**
