

Feel the difference.

On average the air we breathe indoors is two to five times more polluted than the air outside and in certain cases it can be significantly higher than that. Chemicals, gasses, odors, mold spores, dust mites, particulate matter, volatile organic compounds, ozone, carbon monoxide, formaldehyde, the list is seemingly endless but it all boils down to one thing. It is bad for your health.

Indoor air quality is a health problem in a home or at the office. The problem exists because the air we breathe indoors is polluted. The pollution comes from a myriad of sources. Toxins, pollutants, noxious substances, they are all around us, emitted by everything from rugs to perfume, from printers to furniture, from an HVAC systems to the cleaning solutions used to keep things clean – and of course – there is the air outside.

Short-term symptoms are things like fatigue, headaches, itchy eyes, raspy throat, and nasal congestion. The long-term health effects include such things as asthma, emphysema, bronchitis or even limited reproductive function or shorter life expectancy.

Breathing clean air is the healthiest and most productive thing you can do for yourself. It will make your immune system stronger and that will make you feel better because you will be better. You will have eliminated a whole lot of stuff that is just not good for you.

Austin Air cleaners make what Mother Nature wants us to breathe - clean air.

SAN ANTONIO - HISTORY & MORE

San Antonio is the ninth largest city in the U.S., offering its visitors an array of things to do and see. Enjoy fine dining, shopping, entertainment or a cruise along the River Walk. Tour the Alamo (a must see for history buffs) or other missions along the San Antonio River. If you prefer a little excitement, then check out Six Flags San Antonio or Sea World.

Whatever you desire (arts, museums, fine dining, entertainment, amusement parks) San Antonio has something for you!

Henry B. Gonzalez Convention Center

Located in the heart of San Antonio, this facility has recently undergone a major renovation and expansion, including an extension of the River Walk directly under the center. GSA EXPO 1999 was held here, but EXPO 2003 returns with four times the exhibit space and three times the training sessions!
