## JWOD PRIME PRODUCTS

The Navy's Plastics Removal in Marine Environment (PRIME) Program is a source reduction program that focuses on evaluating every item the Navy uses aboard ships and determining the environmental acceptability at the point of disposal. By carefully selecting the items that go aboard ships and specifying the types of allowable packaging, the Naval Supply Systems Command (NAVSUP) can influence the amount and composition of the waste stream that will require processing. One way to reduce the amount of plastics in the ship's waste stream is to purchase non-plastic items in place of their plastic counterparts. The use of plastic supply items requires more space aboard ship devoted to storage of plastic trash for land disposal. To assist ship personnel in ordering non-plastic substitutes meeting the requirements of the PRIME Program, the General Services Administration has identified items on the GSA *Advantage!*<sup>™</sup> website with a "PRIME" logo. The following JWOD items, provided by Americans who are blind or who have other severe disabilities, meet the requirements of the Navy PRIME Program and are available for purchase through GSA *Advantage!*<sup>™</sup>

**Boning Knife**

NSN 7340-00-197-1271

Price: \$4.72 ea.

10" long overall. Stainless steel blade measures 6" long and efficiently bones meat or fish. Has a plastic handle.

**Paring Knife**

NSN 7340-00-488-7939

Price: \$2.76 each

7" overall length. Short-bladed, 3-1/4"-long, stainless steel knife affords control and maneuverability in peeling and trimming operations. Comes with a plastic handle. Conforms to NSF standards.

**Potato Peeler**

NSN 7330-00-238-8316

Price: \$.67 ea.

6" long. Steel peeler is for manually peeling, coring and eyeing vegetables and fruits. Swiveling, sharp-slotted stainless steel blade cuts in either direction. Has a sharp, rounded tip.

**Oven Mitt**

NSN 7330-00-379-4439

Price: \$2.28 ea.

Insulated oven mitt protects hands and wrists from heat. Features a 6" x 1" tape for slipping over wrist and is made of resin-treated, terry knit cotton with an insulated liner. Preshrunk and washable. Measures 8-1/2" x 11-1/2"

**Food Service Apron**

Washable, reusable, white cotton drill cloth, food service apron. White cotton tie tapes secure apron at the waist. All apron edges are either selvage or has a hem finish.

NSN 8415-00-051-1173

Price: \$4.83 ea.

Waist-style apron. 32" W x 30" L

NSN 8415-00-634-0205

Price: \$6.13 ea.

Bib-style apron. 32" W x 42" L

NSN 8415-01-045-0587

Price: \$5.44 ea.

Bib-style apron. 26" W x 35" L

**Cheesecloth**

Plain weave, bleached, white, cotton cheesecloth suitable for cleaning and polishing.

NSN 8305-01-125-0725

Price: \$1.78

Commercial Grade No. 10 (light weight). 35" width, 5 yard package.

NSN 8305-00-205-3496

Price: \$4.89

Commercial Grade No. 50 (medium weight). 35" width, 10 yard package.

NSN 8305-00-205-3495

Price: \$42.48

Commercial Grade No. 50 (medium weight). 35" width, 100 yard bolt.

NSN 8305-00-262-3321

Price: \$37.40

Commercial Grade No. 90 (heavy weight), 35" width, 50 yard bolt.

## JWOD PRIME PRODUCTS (CONT'D.)

**Sponge****Natural 3-5/8" x 5-3/4" x 1-3/4"****Price: \$1.16 ea.****NSN 7920-00-884-1116**

Uncompressed form has coarse pores. Use this durable and absorbent sponge for general cleaning with commercial detergents, soaps and cleaning agents. Soft and pliable when wet, sponge is made of regenerated cellulose.

**Natural 3-5/8" x 5-3/4" x 1-3/4"****Price: \$1.02 ea.****NSN 7920-00-240-2555**

Fine-textured sponge is compressed by 80% for increased storage efficiency. May be used for photographic purposes. Use this durable and absorbent sponge for general cleaning with commercial detergents, soaps and cleaning agents. Soft and pliable when wet, sponge is made of regenerated cellulose.

**Pad, Cleaning and Polishing****NSN 7920-00-151-6120****Price: \$6.59 pg.**

White, nonwoven, nonmetallic, and nonabrasive, polyester material is for washing and scrubbing painted or unpainted aircraft exteriors. Pad measures 6" x 12" x 3/8"

**Wet Mop****NSN 7920-00-224-8726****Price: \$7.08 ea.**

Cotton yarn mop is used for swabbing floors and decks. Twine is used to firmly and permanently attach four-ply yarns to the 60" long fixed wooden handle. Measures 17" long.

**Paper Towel, Navy Pack****NSN 8540-01-055-6134****Price: \$43.32**

Paper towel, Kraft color, single-fold type, interlocking design, used for wiping and drying of hands. 9 1/4" wide x 10 3/4" long, folded to 5 1/2" x 9 1/4". Each box has 16 packs of 250 towels for total box quantity of 4000 towels. Packed in weather resistant box, with all seams and joints sealed with weather resistant tape. Will fit most single fold towel dispensers. Made from paper containing a minimum of 40% Post Consumer Recycled Materials and 40% recovered materials. Meets CPG guidelines.

**Wiping Cloth****NSN 7920-00-965-1709****Price: \$45.05**

Soft and absorbent paper towels. Three-ply, strong, lightweight and non-scratching. These towels are intended for use on clear plastic aircraft canopies but will absorb water and oil in many uses. Each pop-up dispenser package contains 90 15-1/4" x 16-3/4" white towels. Unit of issue box contains 15 dispenser packages (1350 total towels).

**Wire Brush****NSN 7920-00-291-5815****Price: \$2.04**

Scrub away paint, rust and acid stains with this steel-wire brush. Bristles are made of carbon steel wire, are arranged in 4 x 18 rows and are 1-1/8" long. Wooden or molded plastic rocker block has an integral curved handle that measures 13-3/4 x 1-1/4 x 3/8".

**Deck Covering****NSN 7220-00-205-0389****Price: \$1.96**

Prevent slippage on board ships with this self-adhering, nonslip covering. The silicon carbide particle-coated fabric provides a nonslip surface, and the adhesive-coated back has a removable protective covering to prevent contamination of adhesive prior to use. Adheres to clean, dry surfaces without wrinkling, breaking or lifting. Noncorrosive, lightweight and resistant to detergents. Black covering measures 24" wide and 6" deep.

**Mattress Cover****77" x 36" x 6-1/8" Mattress Cover****NSN 7210-00-291-8419****Price: \$211.89 pg.**

Made of 7-oz unbleached white cotton drill. Box-style pre-shrunk mattress cover has boxed corners, lapped seams and end slit opening with three pairs of tie tapes, each 5/8" wide by 10" long, for closure. Use on mattress that is 2" shorter, 1" narrower and 1/2" less deep than mattress cover dimensions.

## JWOD PRIME PRODUCTS (CONT'D.)

**Mattress Cover****82-1/2" x 43-1/2" Mattress Cover.**

NSN 7210-00-883-8492

Price: \$12.71 ea.

Pre-shrunk cover is made of 4.2-oz unbleached white cotton or 3.5-oz bleached polyester/cotton sheeting. Protect mattresses with an envelope-style mattress cover. Has plain seams and a 6" end flap with three pairs of tie tapes, each 5/8" wide by 10" long, for closure. Length of mattress cover (exclusive of flap) should equal length plus thickness of mattress plus one inch.

**Pillowcase (Bed Linens)**

White color, standard size, 128 yarn count cotton/polyester blend muslin pillowcases.

NSN 7210-00-259-8897

Price: \$29.82 dz.

**20-1/2" x 32-1/2" Standard Pillowcase.** Has no marking.

NSN 7210-00-259-9004

Price: \$25.87 dz.

**20-1/2" x 27-1/2" Standard Pillowcase.** Marked with "US" in black letters on the inside of the pillowcase (marking does not show through).

NSN 7210-00-259-9005

Price: \$31.04 dz.

**32-1/2" x 22-1/4" Standard Pillowcase.** Marked with "US" in black letters on the inside of the pillowcase (marking does not show through).

**Label Holder**

NSN 9905-00-866-0334

Price: \$33.03

Aluminum holder has a pressure-sensitive adhesive backing with a protective liner. Features a plastic window shield and a solid back. US Army Natick Lab Drawing 8-2-165. 12-month maximum shelf life (extendable). Measures 9-11/16" x 11-3/4"

**Flashlight**

NSN 6230-00-163-1856

Price: \$3.79 ea.

Heavy-duty model uses two D cell batteries (not included). Comes with one PR-2 bulb installed, plus a spare bulb that is stored in the watertight plastic case, with hanger ring. Tube-shaped flashlight has a three-way switch for on, off and flasher functions. Features a roll-resistant design and a clear, prefocused spot lens.

**STOCK UP TO ENVIRONMENTALLY FRIENDLY  
JWOD OFFICE ESSENTIALS**

Spring is just around the corner- the perfect time to organize your desk and stock up on "green" JWOD office supplies you need to get the job done! Be sure to visit [www.gsaAdvantage.gov](http://www.gsaAdvantage.gov) or [www.jwod.com](http://www.jwod.com) to order the environmentally friendly products made by NISH associated nonprofit agencies featured below:

**Paper Clips**

These standard No. 1 size paper clips contain over 60% recycled content and are made of the highest quality steel with a corrosion resistant finish. Won't mark paper!

**Bag of 100 Paper Clips**

7510-01-467-6738 .....\$0.31 pk.

**Box of 1,000 Paper Clips (10 bags of 100 clips each)**

7510-00-161-4292.....\$2.25 mx.

**Tape Dispenser**

This contemporary style tape dispenser is made of 100% recycled impact-resistant plastic and can accommodate a 36-yard role of tape up to 3/4" wide. Rubber feet prevent marring or slipping, and the serrated cutting edge is guarded for safe handling. Weighted for extra stability.

**Black**

7520-00-240-2411 .....\$2.10 ea.

**Inter-Department Envelopes**

These 10" x 13" inter-department envelopes are made of 28 lb. recycled brown Kraft stock. Six see-through holes ensure that important documents are not left in envelope. Box of 100.

**3 column, printed on both sides, contains 30% post-consumer waste**

7530-01-463-3909.....\$15.00 bx.

**5 column, printed on one side, contains 30% post-consumer waste**

7530-01-463-3908.....\$15.00 bx.

**5 column, printed on both sides. Contains 100% post-consumer waste**

7530-01-463-3910.....\$15.00 bx.

**Desk Pad**

This practical desk pad with smooth writing surface is made of 30% post-consumer waste paper. Paperboard back with two facing sheets and four triangular artificial leather corners.

**Size 19-1/4" X 24-1/4"**

7520-00-224-7238 .....\$3.19 ea.

**Daymax Planners and Calendars**

The full line of Daymax calendars, planners, refills and accessories are made with 30% post-consumer waste paper. Choose from several different styles and colors.

**Appointment Book Refill, 2002**

7530-01-450-5417 .....\$3.06 ea.

**Calendar Pad, 2002**

7510-01-450-5462 .....\$2.08 ea.

**Pocket Planning Set, 2002**

7510-01-450-5435 .....\$4.09 SE

**GLE Planner, Black, 2002**

7530-01-478-1416 .....\$39.46 ea.

**GLE Planner, Burgundy, 2002**

7530-01-478-1414 .....\$39.46 ea.

**GLE Planner, Navy, 2002**

7530-01-478-1415 .....\$39.46 ea.

**IE Planner, Black, 2002**

7530-01-477-8133 .....\$31.34 ea.

**IE Planner, Burgundy, 2002**

7530-01-477-8132 .....\$31.34 ea.

**IE Planner, Navy, 2002**

7530-01-477-8134 .....\$31.34 ea.

**LE Planner, Black, 2002**

7530-01-478-1413 .....\$47.14 ea.

**LE Planner, Burgundy, 2002**

7530-01-478-1417 .....\$47.14 ea.

**LE Planner, Navy, 2002**

7530-01-478-1412 .....\$47.14 ea.

**GLE Day at A View, 2002, 7-hole**

7510-01-477-8144 .....\$11.21 ea.

**GLE Week at a View, 2002, 7-hole**

7510-01-477-8143 .....\$7.00 ea.

**GLE Month at a View, 2002, 7-hole**

7510-01-477-8139 .....\$5.45 ea.

**IE/LE Day at a View, 2002, 3-hole**

7510-01-477-8138 .....\$8.43 ea.

**IE/LE Week at a View, 2002, 3-hole**

7510-01-477-8137 .....\$7.00 ea.

**IE/LE Month at a View, 2002, 3-hole**

7510-01-477-8131 .....\$5.45 ea.

## NO TIME IS A GOOD TIME FOR A PAPER JAM

And furthermore, some times are even worse than others.

That's why our paper is as close to jam-proof as you can get.

Here's why. Whether you chose one of our generic brands or Xerox brand copier paper, you'll be getting paper that's been manufactured with unsurpassed quality control.

That's how we make certain that the paper we ship to you is completely reliable.

So time after time, you can depend on getting consistently clean, sharp copies.

Copier paper from GSA works equally well in both high speed or desktop copiers. You can also use GSA copier paper in laser, bubblejet, or ribbon printers with excellent results. You can even use it in offset duplicating equipment. And you can rely on it for uniform weight and thickness giving a smooth, clean appearance that has low opacity with every copy.

And when you buy copier paper from GSA, you'll also be in compliance with all federal regulations on recycling, including Executive Order 13101.

So you can make great copies while you help protect the environment. The only thing you won't be doing is jamming up your copier.

**Xerox Brand Copier Paper**

**Size: 8-1/2" x 11"**

**NSN: 7530-01-454-8006**

**Price: \$34.28**

**GSA Copier Paper**

**Size: 8-1/2" x 11"**

**NSN: 7530-01-335-2623**

**Price: \$27.90**

## Federal Supply Schedule 69 Training Aids & Devices

### COMPLIANT'S OUTSOURCE SOLUTIONS FOR PUBLIC ACCESS DEFIBRILLATION PROGRAMS IN FEDERAL FACILITIES

One out of every 1,000 people will be the victim of sudden cardiac arrest (SCA) this year. In 1999 and 2000, 13 percent of all workplace fatalities reported to OSHA were due to SCA. Today, we are fortunate enough to have automated external defibrillators (AED) that allow us to literally jump-start a heart that is beating irregularly or has stopped beating from SCA. The problem we face is in identifying, coordinating, and managing all of the other components that allow the AED to be successfully used. That is where Compliant's outsource solutions come in.

#### Sudden Cardiac Arrest & the Federal Government

In 1999, the Cardiac Arrest Survival Act was enacted in response to this significant threat, recommending that the Federal Government implement Public Access Defibrillation (PAD) programs in their facilities in order to be able to respond to cases of sudden cardiac arrest. However, implementing a PAD program and saving a life requires more than buying an AED and adding it to your medical supplies cabinet.

Saving someone in sudden cardiac arrest takes the same kind of planning and preparation that any emergency response requires—coordinated actions taken within minutes of the occurrence. With each minute that an electric shock from a defibrillator is delayed, the chance of survival from sudden cardiac arrest drops nearly 10 percent. At 10 minutes, the chances are dismal.

Understanding the complexity of this issue and its need for structure, the General Services Administration in conjunction with the Department of Health and Human Services recently released guidelines for PAD programs in federal facilities. These guidelines provide an outline of elemental components required for a functional program. They include medical requirements; necessary equipment and supplies; equipment placement; service and maintenance; legal requirements; documentation and record keeping; responder training; and overall program management. Without any one of these aspects, the program will eventually fail in its ability to function, whether it is today, tomorrow or sometime in the future.

#### Where to Start?

Just as organizations utilize experts for the installation of technology, implementing a complex PAD program requires specialized skills and knowledge. Most organizations have neither the time nor expertise to coordinate activities, locate medical direction, complete required paperwork, or schedule the training and service required to be able to effectively use medical devices like an AED.

This is especially true of the federal government where the expertise may be available, but the time is not. With the federal civilian payroll at its lowest level since 1950 and legislation like the Federal Activities Inventory Reform (FAIR) Act, it has become more important for agencies to identify commercial vendors that can perform tasks that are not part of the government's focused priorities.

#### Compliant Provides an Outsource Solution

Compliant removes this time- and resource-intensive burden from your personnel by organizing, tracking and coordinating the program from the initial implementation through day-to-day administration. Many of their current clients, including Amtrak, the US Army Corp of Engineers, Gillette, and BASF have outsourced to Compliant for the simple reason that their turnkey programs allow them to focus on their core competencies, instead of coordinating multiple vendors or attempting to manage the program in-house.

#### Work with Experts

Compliant brings a wealth of experience to every program. Compliant's educators are certified by the American Heart Association, National Safety Council and American Safety and Health Institute. Their Account Specialists coordinate and document all training, service, and maintenance.

#### A Turnkey Program

Every aspect of a program—from the initial implementation through ongoing management—are coordinated, executed, and documented by Compliant. Their programs also include all of the necessary equipment, supplies, training, protocols, medical direction and maintenance required to function effectively. Compliant's PAD and Medical Emergency Response Programs meet:

- The U.S. General Services Administration, American Heart Association, Building Owners and Managers Association, and American College of Occupational and Environmental Medicine guidelines and recommendations for AED programs.
- All state and federal "Good Samaritan" laws and regulations.
- AED manufacturer warranty/indemnity requirements regarding maintenance.
- OSHA regulations regarding bloodborne pathogens.

## Federal Supply Schedule 69 Training Aids & Devices

### COMPLIANT'S OUTSOURCE SOLUTIONS FOR PUBLIC ACCESS DEFIBRILLATION PROGRAMS IN FEDERAL FACILITIES (CONT'D.)

#### The Compliant Program

All of Compliant's programs can contain the following elements.

#### Program Development

##### Project Management

- Compliant coordinates the delivery of equipment, system setup and training schedules based on site management's needs.
- Integrates all new facilities and authorized users into single point of contact and documentation systems.
- Provides new user orientation for authorized management personnel on their systems.

##### Site Assessment

Emergency response specialists walk through your facility and deliver a written report recommending number of AEDs required, where to place equipment, and the number of trained responders required.

##### Medical Direction & Oversight

Compliant provides

- A prescription to purchase as required by GSA Guidelines and federal law
- Assistance with equipment registration and paperwork with proper authorities
- Response Protocols
- Non-emergency question hotline
- Oversight of the program.

#### Program Implementation

Responder Training is provided to 10 responders on-site (available 24/7/365) by professional Compliant Educators. Two-person team training is provided in: CPR/AED (nationally accredited), Basic First Aid, Oxygen Administration, Response Protocols, Bloodborne Pathogens

#### Equipment and Supplies

Compliant provides

- An AED (If Needed) Emergency Oxygen
- CPR Voice Prompt
- First Aid, Patient Prep and Bloodborne Pathogens Protection/Clean-up Kits
- Storage and Transportation kit

#### Ongoing Program Management

##### Program Administration

A Compliant Account Specialist serves as a single point of contact to all facilities for training, requests for service, and issue resolution. At program initiation, the specialist contacts site management to provide an overview of the program, sends them the appropriate documentation and paperwork, and then sets-up the program to their requirements (training schedule, equipment delivery, medical direction). In this way, the Compliant Account Specialist serves as the driver to start-up the program. In addition, Account Specialists: Schedule classes for each facility; Track certification-expiration for trained responders; Monitor and coordinate equipment service, including delivery and setup, supply replenishment, and semi-annual and post-incident service.

##### Post-Incident Support

Compliant provides

- 24-Hour Post-Incident Service including retrieval of incident data from unit
- Replenishment of used supplies
- Evaluation and forwarding of incident data to proper authorities

##### Service & Maintenance

Compliant provides

- 24-hour Supply Replenishment
- 24-hour Equipment Malfunction
- Bi-Annual Maintenance

Federal Supply Schedule 69  
Training Aids & Devices

**COMPLIANT'S OUTSOURCE SOLUTIONS FOR PUBLIC ACCESS DEFIBRILLATION PROGRAMS IN FEDERAL FACILITIES (CONT'D.)**

**Documentation & Record Keeping**

Compliant records all facets of a program in a proprietary documentation and record keeping system that can be used to verify compliance for internal or external audits. This includes:

- Equipment Location
- Equipment Configuration
- Supply Expiration Dates
- Last Service Date and Service Ticket
- Training Rosters
- Certification Expiration
- Incident Response Information

**Available Programs**

If you are interested in Compliant's programs, they are located on GSA Schedule 69 (Contract # GS 02F 0008M, SIN Number 27-400). Below is a sample of their more popular programs. Additional program configurations can be found on the GSA Schedule.

**Comprehensive Medical Emergency Response Programs**

**Comprehensive Medical Emergency Response Program with New AED (SKU No. GSA008):**

LifePak 500 Biphasic AED with Lithium Battery and Electrodes; Equipment/Supply Storage and Transportation Kit; Emergency Oxygen; Emergency Response Supplies; All Required Medical Support; Training in AED Use, CPR, Basic First Aid, Emergency Oxygen and Bloodborne Pathogens; Supply Service and Replenishment; Equipment Maintenance and Service; Post-Incident Coordination; Program Management & Online Documentation – **1-time AED purchase and system setup - \$2,499; Annual Service Agreement - \$1,970**

**Comprehensive Medical Emergency Response Program to Support Existing AEDs (SKU No. GSA005):**

Equipment/Supply Storage and Transportation Kit; Emergency Oxygen; Emergency Response Supplies; All Required Medical Support; Training in AED Use, CPR, Basic First Aid, Emergency Oxygen and Bloodborne Pathogens; Supply Service and Replenishment; Equipment Maintenance and Service; Post-Incident Coordination; Program Management & Online Documentation – **Annual Service Agreement - \$1,970 per year**

**Basic PAD Programs**

**Basic PAD Program to Support Existing AEDs (SKU No. GSA003):**

All Required Medical Support; Training in AED Use, CPR, Basic First Aid, Emergency Oxygen and Bloodborne Pathogens; Equipment Maintenance and Service; Post-Incident Coordination; Program Management & Online Documentation – **Annual Service Agreement - \$1,799 per year**

**Basic PAD Program without Training to Support Existing AEDs (SKU No. GSA004):**

All Required Medical Support; Equipment Maintenance and Service; Post-Incident Coordination; Program Management & Online Documentation – **Annual Service Agreement - \$899 per year**

## Federal Supply Schedule 871 Professional Engineering services

### DIGITAL GLUE: A NEW APPROACH TO SIMULATION COLLABORATION

DESE Research, Inc. has developed a new software construction process called Digital Glue that leverages the power of newly developed scripting languages to link together the operation of disparate models and simulations of military systems. The technology is applicable to other simulation domains as well. The principal advantage of this approach over conventional solutions is that Digital Glue is non-intrusive to the simulations or models that are being tied together. Digital Glue can be universally applied over a wide range of domains wherever software is the connecting medium including simulations, fire control systems, and communications to help attain the goal of a "plug-and-play" capability. Digital Glue provides a quick path to reuse of new or existing simulation components across multiple platforms/operating systems, functional modeling and simulation communities, and runtime infrastructures.

#### Shortcomings of Conventional Approaches

The most intuitive approach to integrating disparate simulations built by different developers for particular purposes is to build a common infrastructure or architecture of computer hardware and software and then to force-fit the systems into this infrastructure by establishing a common format. While superficially attractive, practice has shown that this process is difficult and costly to implement not to mention the "political" difficulties of negotiating and establishing a common format or protocol. Not only is the infrastructure expensive and complex to build, but the underlying systems themselves must be significantly altered to fit within the infrastructure and conform to the common format.

#### An Innovative Approach

Instead of making the elements conform to an infrastructure, Digital Glue utilizes an architecture that conforms to and wraps around the systems whose operation is to be integrated. To accomplish this, a whole new generation of programming languages known as "scripting" languages are applied to glue together the separate system into an apparently single entity. Up until now, translating data among various formats and sharing it between systems has been prohibitive due to the resource constraints of long processing times and reformatting. These new scripting languages are dynamically typed (as opposed to statically typed like Ada or C++) and thus make it relatively easy to tie together systems with different interfaces and data formats. The scripting language evaluates data in the same typeless manner as a human, without being bogged down by superficial differences in information presentation. This method of tying together multiple simulations in a collaborative manner is in direct contrast to a homogeneous infrastructure where the constituent simulations themselves must be altered to conform to a common protocol.

The scripting languages behind Digital Glue are extremely efficient to code thus encouraging a spiral development methodology of early prototype testing and user feedback. Experience on a mission planner for space control applications has shown that processes behind Digital Glue, undergirded with scripting languages, can reduce schedules by half, and total costs by 80%.

#### Expertise Ready to be Applied

DESE is already actively applying Digital Glue technology to DOD and other simulation integration tasks including simulations, weapon system planners, and data gathering. DESE has in-depth knowledge and experience in the application of scripting languages including their use as wrappers for existing software as well as direct experience and expertise in DOD and other application domains.

Federal Supply Schedule 75 II A  
Office Products & Services

**ENVELOPES, DIRECT TO YOU!**

Good news on envelopes! We now have the following contractors offering envelopes under Multiple Award Schedule 75 Part II Section A for Office Products and Services. You can contact the firms directly for your ordering needs. When you call please specify that you are ordering off the GSA contract and cite the contract number below. These products are also available on GSA Advantage!™ To get envelopes in a jiffy, go to [www.gsaAdvantage.gov](http://www.gsaAdvantage.gov), enter, then type in envelope and just pick and click to shop.

*Additional awards will be made in the near future.*

## NATIONAL FURNITURE CENTER'S EXPRESS DESK

The GSA National Furniture Center's Express Desk offers a unique service. It is a fax-based ordering tool that was developed to make ordering **FURNITURE AND FURNISHINGS** easier for customers and to reduce the administrative costs of processing multiple requisitions. Customers simply fax their orders to a dedicated fax machine. Multiple line items can be consolidated under a single requisition by simply attaching a bill of materials with the requisition. Upon receipt of all the ordering information, we place a delivery order within 48 hours. It is fast and simple, and has the value-added service of enabling related orders to be managed as projects (for example, scheduling carpet delivery and installation before furniture is delivered).

### Advantages of the Express Desk

- 24 hour, seven-day-a-week ordering (by fax)
- Purchase orders placed with Federal Supply Schedule suppliers within 48 hours after receipt
- Faxed acknowledgement of procurement order
- Order handled by experienced professionals familiar with the FAR
- Personalized service by GSA associates
- Ideal for priority projects and urgent requirements
- Order accountability and tracking
- One-stop shopping using proven project management techniques
- Hassle-free ordering
- Follow-up to ensure customer satisfaction
- Best Value Determination Guidelines faxed to customer for convenience

### Important Items to Include

- Item Description
- Manufacturer/Supplier
- Quantity
- GSA Contract Number(s)
- Picture of the Item (if available)
- Military Interdepartmental Purchase Request (MIPR-DD Form 448)
- Part Number, Model, NSN
- Price
- FEDSTRIP (SF-344)
- MILSTRIP (DD-1348-6)
- Color, Fabric, Finish
- Point of Contact, Phone, Fax
- Best Value Determination

Multiple line items can be consolidated under a single requisition. Simply attach a bill of materials (product list for each contact) with your requisition. A separate requisition is needed for each contract number.

Customers can fax their orders TOLL FREE: 877-240-6453, attention "Express Desk." Non-toll free fax: 703-305-7934. For more information, call 703-305-7003 or **e-mail: [express.desk@gsa.gov](mailto:express.desk@gsa.gov)**.

## MULTIPLE AWARD SCHEDULES HELP DESK

### Need training? Have questions?

Help is just around the corner! GSA Multiple Award Schedules Helpdesk is your one-stop shop for all your GSA Schedule needs! For day-to-day questions or to request free training at your agency's facility or training function on the GSA Schedules program, please contact the MAS Help Desk on (703) 305-6566 or e-mail at **[MASHelpDesk@gsa.gov](mailto:MASHelpDesk@gsa.gov)**

# FOSE 2002

MARCH 19 - 21, 2002  
WASHINGTON DC  
CONVENTION CENTER  
[www.fose.com](http://www.fose.com)

Welcome to FOSE 2002!

GSA's Federal Supply Service is proud to support FOSE 2002, this year's premiere IT event for Federal employees who want to experience the latest in dynamic world-class technology that the industry has to offer.

Visit the GSA booth (FOSE Booth #1810) to discuss IT solutions that can make your job easier. You may also come away with a glimpse of the future that will help you to plan your agency's development and guide your path through the years to come.

While at our booth, ask a staff member to demonstrate GSA Advantage! ([www.gsaAdvantage.GOV](http://www.gsaAdvantage.GOV)), the Federal Government's award winning e-commerce shopping site and your gateway to the thousands of best-value products and services offered exclusively to Federal agencies. The GSA booth staffer can also show you how to navigate the FSS Schedules E-Library, where you'll find the latest GSA and VA schedule contract award information.

Or you can enter the world of the U-MAS Virtual Campus where you'll find a series of classroom buildings covering subjects like the MAS Federal Supply Schedule Program and Ordering Procedures to Performance Based Contracting, along with information on How to Become a Schedule Partner.

You can learn more about e-Buy, GSA's electronic request for quote solution designed to facilitate your request for submission of quotes for commercial products and services. Our booth staffer can show you how to post an RFQ in order to obtain quotes from schedule contractors, resulting in a best value purchase. (If you have an account on GSA Advantage! you are automatically registered for e-Buy.)

If you're a Federal worker who has to take care of business on the run, GSA's E-Connected Intelligent Remote Operations (EIRO) solution-- also featured at FOSE 2002-- will be of special interest to you. You'll learn how EIRO can help you to meet your remote communications and networking needs, connecting your remote staff wherever they may be and establishing network-connected operations.

You'll learn all of these things and more if you stop by GSA Booth #1810 at FOSE 2002.

FOSE 2002 will be held at the Washington, D.C. Convention Center, March 19-21.

For more info, visit: [www.fose.com](http://www.fose.com)

Human Resources & EEO Services**

**THE HERRING IMPACT GROUP**

The HERRING IMPACT Group specializes in providing career and transition counseling assistance, helping displaced individuals locate employment and assisting families in coping with the complexities of relocation. The IMPACT Group's family/career consultants have worked with individuals in more than 4,800 locations. The Social Security Administration, the Department of State, and the DEA/FBI are among the United States Federal Government agencies that have benefited from the transition programs of The IMPACT Group.

The IMPACT Group's complement of programs can support government employees and their families throughout the cycles of work and life transitions. These programs include:

- Outplacement and career transition programs
- Spouse employment assistance during relocation
- Family relocation acclimation services
- Work/life resource & referral programs for dependent care needs and life transitions

**Outplacement and career transition programs** include both the traditional, one-to-one career counselor assisted programs and a cutting-edge self-directed electronic program. Our job search support philosophy incorporates motivational and proactive strategies that expedite a search. All programs can be customized on request.

**Spouse employment assistance during relocation** is the banner service of The IMPACT Group. The spouse job search assistance programs offer a lineup of specialized services which are tailored to meet the various needs of dual career families. These programs are designed to ease relocation transition and speed re-employment of the accompanying spouse.

**Family relocation acclimation programs** address personal, work, and family concerns through research and consulting, and are tailored to meet the various needs of transferees, their spouses and families.

Work/life resource and referral programs are designed to support the recruitment, retention and productivity goals of the employer by providing customized community information to employees and their families.

Founded by Laura Herring and incorporated in 1988, The IMPACT Group is a woman-owned, small business.

## GSA Schedule 738-X Human Resources & EEO Services

### KORN/FERRY INTERNATIONAL

For more than 30 years, Korn/Ferry International (KFI) has been a leader and innovator in executive search and assessment. Since 1969, the company's core focus on senior executive search to secure CEOs, CFOs, board members and other top executives has resulted in over 80,000 senior-level searches or clients in virtually every industry around the globe, including not-for-profit organizations and government agencies. Each year, nearly 5,000 clients and 1.5 million candidates experience the high quality service that Korn/Ferry delivers on a regular basis.

In addition to senior-level search, Korn/Ferry provides middle-management recruitment through its subsidiary *Futurestep*, which combines the high quality service and expertise of traditional executive search with the speed of the Internet. Drawing from a database of more than one million prescreened professionals, Futurestep consultants utilize proprietary matching technology and assessment tools to meet each client's specific requirements.

Korn/Ferry can also provide entry-level recruitment online through its *JobDirect* college recruitment service. Through close relationships with university campus career centers as well as college-age and entry-level job seekers, JobDirect provides clients with innovative and efficient solutions for first-level recruitment.

Korn/Ferry's reputation for innovation in executive recruitment started as early as 1970 when the company introduced its first global specialty practice, one of the first in the industry and an effort that has expanded in the years since. In 1988, the company established its Not-For-Profit/Association/Public Policy specialty practice, comprised of education, not-for-profit and government/public administration sectors—recruiting senior-level executives to colleges and universities, professional and industry associations, charitable and philanthropic organizations, cultural arts entities, as well as government and quasi-government agencies. In addition they have the following specialty practices: Healthcare, Advanced Technology, Defense/Aerospace, Financial Services, Industrial, Professional Services, Hospitality, Media and Entertainment and their newest practice Homeland Security.

The Homeland Security practice serves enterprise level organizations and government by providing security focused products and services. The practice coordinates the KFI matrix search experience and market expertise from Advanced Technology, Education, Energy, Healthcare, Industrial and Professional Services and Government. Korn\Ferry

International's acute focus is on the strategic leadership positions in this field. Sector interests in asset, data, communication, and personal security with a clear experience and focus on "detection, protection, surveillance and avoidance" are the cornerstones of this practice."

The Korn/Ferry consultants are experienced and knowledgeable in government, with strong expertise in the arenas they serve. Korn/Ferry has a impressive government list of successful search assignments, including work for the Peace Corps, the Department of Education, the Overseas Private Investment Corporation and 36 searches with the Internal Revenue Service.

Last year Korn/Ferry's Not-For-Profit/Public Policy practice handled over 300 assignments for clients around the world, crossing all levels and functions. With more than 10 candidates interviewed for each position, the company conducted more than 3,000 interviews with senior-level executives experienced in this arena.

**OMNIPLEX WORLD SERVICES CORPORATION**

OMNIPLEX World Services Corp (OMNIPLEX) has been providing investigative services to numerous federal government agencies since 1995. Headquartered in Chantilly, VA just west of Washington D.C., OMNIPLEX has its operations center and command and control element for investigative services located there also. This element has an automated management capability to ensure responsive and responsible support to its customers and allows for 24 hours a day, 7 days a week operational capability. OMNIPLEX has amassed a nationwide network of over 1,500 investigators with coverage in every state to include the District of Columbia. These investigators have an average of 20 years experience in conducting investigations, gained through experience with federal agencies like the Federal Bureau of Investigations, Central Intelligence Agency, U.S. Secret Service, National Security Agency, U.S. Customs Service, Drug Enforcement Administration, Department of State, Defense Investigative Service, the Office of Personnel Management and military services in the Department of Defense.

Its customers have recognized OMNIPLEX as a top performer when it comes to quality and on-time delivery of the requisite reports. OMNIPLEX provides its services at a reasonable price as shown in the GSA Contract. If you need quality investigative services done on time please contact OMNIPLEX at the addresses shown below.

## GSA NOW PROVIDES "ONE-STOP SHOPPING" FOR ENVIRONMENTALLY RESPONSIBLE GROUNDS MAINTENANCE

In January 2001, the General Services Administration Hardware SuperStore awarded its first service contract for nationwide grounds maintenance to Joppa Maintenance of Hampstad, North Carolina. This procurement requires that Joppa document to the Responsible Contracting Officer and Federal Customer that all landscaping materials used comply with the latest U.S. Environmental Protection Agency (U.S. EPA) "Comprehensive Procurement Guideline" affirmative procurement requirements, and that all services completed follow the environmental and economical landscaping practice as outlined in the Federal Register and as mandated in Executive Order 13148. Federal customers using GSA grounds maintenance services therefore enjoy streamlined procurement, and full compliance with the U.S. EPA affirmative procurement and land management stewardship mandates.

### Background

**Affirmative Procurement:** Section 6002 of the Resource Conservation and Recovery Act (RCRA) formally establishes the Federal Government's "buy-recycled" or "Comprehensive Procurement Guideline (CPG)" program. This statute requires the U.S. Environmental Protection Agency to designate items that are or can be made with recovered materials and to prepare guidelines that assist procuring agencies in complying with affirmative procurement requirements. Landscaping materials are one such category. Within the "landscaping material" category, U.S. EPA has established Recovered Material Advisory Notices (RMANs) for mulch, compost, edging, hoses and timber, recommending between 25% and 100% postconsumer material content depending on the item and how it is constructed.

**Land Management:** Federal Register, Volume 60, Number 15, Page 40837, August 10, 1995 establishes a framework for environmentally and economically beneficial landscape practices on federal landscaped grounds. This framework includes the following:

- Use of Regionally Native Plants for Landscaping
- Construction Practices that Minimize Adverse Effects on the Natural Habitat
- Prevent Pollution
- Implementation of Water and Energy Efficient Practices
- Creation of Outdoor Demonstration Projects

Executive Order 13148, "Greening the Government Through Leadership in Environmental Management, April 22, 2000, Part 6, Landscaping Management Practices, Section 601, Implementation requires that within 12 months from the date of that order, each agency shall incorporate the Guidance for Presidential Memorandum on Environmentally and Economically Beneficial Landscape Practices on Federal Landscaped Grounds (60 Fed. Reg. 40837) developed by the Federal Environmental Executive (FEE) into landscaping programs, policies, and practices.

HMIRS Focal Point  
GSA/FSS/6FEE  
1500 E Bannister Road  
Kansas City MO 64131

**GSA MATERIAL SAFETY DATA SHEETS AVAILABLE  
IN NEW DOD HMIRS**

Soon, GSA customers will find it even easier to obtain Material Safety Data Sheets (MSDSs) for hazardous materials. Not only will paper copies of MSDSs continue to be provided with each delivery of hazardous material, but Federal Community customers everywhere will be able to access the new, on-line Department of Defense "Hazardous Material Information Resource System (HMIRS)" beginning May 1, 2002. HMIRS will replace the current DoD "Hazardous Material Information System (HMIS)" with enhanced system search and data retrieval capabilities.

HMIRS is also expected to improve the speed and accuracy with which new MSDSs are placed in the system. Material suppliers and end users alike will be able to scan and submit on-line MSDS documents anytime and from anywhere. When submitted, scanned images wait in a holding area until "value-added" data is entered in key indexed fields and then are released on-line for worldwide use. Indexed fields allow versatile data retrieval capability. Use of scanned image technology guarantees end users a copy of the original manufacturer document.

Look for the new HMIRS system on-line at <http://www.dlis.dla.mil/> or continue to order a quarterly CD subscription from the SPAWAR Systems Center in Norfolk, VA at telephone 757-445-9192. Customers who only occasionally need an MSDS or who cannot find what they need in HMIRS can also opt to e-mail or telephone requests for MSDSs to the GSA MSDS hotline at [MSDS@gsa.gov](mailto:MSDS@gsa.gov), Toll Free 866-588-7659 or DSN 465-5097. When making your MSDS request, please provide your name, voice telephone number and fax number and/or e-mail address, along with the item's National Stock Number, Manufacturer, Product Name or Part Number and the date of the MSDS that you request if other than the most recent. GSA will normally fill your request by the end of the next business day.

Randy Schober, Environmental Engineer  
HMIRS Focal Point

## GENERAL SERVICES ADMINISTRATION (GSA) SHIPBUILDING AND AEROSPACE COATINGS MANUFACTURERS PROVIDE DOD WITH NECESSARY HAZARDOUS AIR POLLUTANT COMPLIANCE CERTIFICATES

The Clean Air Act National Emissions Standards for Hazardous Air Pollutants (NESHAP – 40th Code of Federal Regulations, Subpart 63.741-63.753, and 63.780) designate "Aerospace Manufacturing and Rework Facilities" and "Shipbuilding and Ship Repair", respectively, as regulated emissions source categories for industrial operations. Both NESHAP regulatory programs seek to *limit emissions* of volatile organic hazardous air pollutants (VOHAPs) and volatile organic compounds (VOCs). One option to comply with these requirements allows affected sources to choose to use only paints that already comply with regulatory content limits or that meet prescribed physical and chemical parameters. Regulated facilities must maintain copies of regulatory correspondence and their facility implementation plan. A "certificate of compliance" documenting product content, and/or physical and chemical characteristics must also be maintained to demonstrate compliance. This certificate is based either on known coating characteristics, or the results of EPA Method 24 volatile organic compound tests.

GSA now requires suppliers to provide these certificates for each new purchase of items regulated by these NESHAP rules. Currently, certificates are received in paper form and faxed to designated U.S. Navy and U.S. Air Force liaison offices at the Naval Inventory Control Point (NAVICP), Mechanicsburg, PA and the U.S. Air Force Ogden Air Logistics Center at Hill Air Force Base, UT for internal service distribution. To date, out of 225 total National Stock Numbered items regulated under the Shipbuilding NESHAP, GSA has received and forwarded to the military 49 certificates. Out of 125 total National Stock Numbered items regulated under the Aerospace NESHAP, GSA has received and forwarded 34 certificates. These certificates represent those products most frequently used.

Suppliers can access these certificates on the Internet. The Shipbuilding certificate is part of the U.S. Environmental Protection Agency "Guidebook on How to Comply with the Shipbuilding and Ship Repair (Surface Coating) Operations National Emission Standards for Hazardous Air Pollutants (EPA-453/B-97-001, January 1997)". The Aerospace certificate is posted on the GSA Hardware SuperStore web site as a downloadable spreadsheet. URL references are as follows. <http://www.epa.gov/ttn/uatw/shipb/shipguid.pdf> [pages E-18, E-32, E-33] [fss.gsa.gov/superstore](http://fss.gsa.gov/superstore) [Select Environmental Issues]

NAVICP is currently working to create a web site so that suppliers will be able to electronically submit these certificates and end users will be able to retrieve needed certificates on-line. This web site will be <http://edod.net/neshap>. Military, Federal Employee personnel and designated contractors are to have access to the site via a log-in.

Has a clockwise non-ratcheting-drive head. 1/2" square male drive. 700 to 1600 in-lb range, 10 in-lb graduation.

**NSN: 5120-01-396-6076****Selling Price - \$463.38 (EA)**

Has a clockwise non-ratcheting-drive head. 3/4" square male drive. 1200 to 4800 in-lb range, 40 in-lb graduation.

## GSA Schedule 738 II Language Services

**ALLWORLD LANGUAGE CONSULTANTS, INC. BUILDS SUCCESS  
ON PARTNERSHIP RELATIONSHIPS**

### GSA... it works.

The question of which laws of common sense govern the quest for success has long been the subject of controversy. When the concept of a schedule for Languages and Linguistics was proposed not long ago, only a handful of companies clearly understood the "simple intricacies" of doing business with the U.S. Government through GSA. I had encountered this phenomenon with another program aimed at expediting processing, the SBA's 8(a). Some consider programs and schedules to be a guarantee. Hence, upon certification, most entrepreneurs assume that mandatory compliance with certain percentages will become their key to success. This speculation usually leads to inactivity and eventual failure. Business relationships are mostly based on affinity, and they have little to do with percentages. Folks do business with people they are comfortable with, and with whom they have established a certain level of trust. As such, there are entrepreneurs who understand that programs and schedules are mere tools that help enterprises substantiate their capabilities and expedite contracting. It is a combined effort. No more, and no less. These companies, fueled by strong management and the desire to capitalize on opportunities, are more than likely to succeed. The rest is up to performance.

The secret to success through the GSA Schedule is to consider the relationship a partnership. The efforts carried out by both parties are directly related to the subsequent outcome. And this outcome usually translates into enormous potential, as companies engage in perpetuating this relationship through advertising, joint ventures, and teaming arrangements with the endorsement of the U.S. Government.

Case in point: ALC. My company was admitted into the Schedule in April, 2000. Forty Two Million Dollars Plus later I can comfortably state that the GSA Schedule works. And it works well. Provided that all parties honor their end of the deal. In a nutshell, the GSA certifies that the vendor is worthy of contractual responsibility, and the vendor capitalizes on the fact that his performance and price schedule have been corroborated and are supported by Government standards. Could entrepreneurs ask for more? Not really, anything beyond would be a gift.

**THE STUFF THAT MOVES GOVERNMENT**

**B**oxes. Cartons. Crates. Even in the age of e-mail and high-speed modems and cell phones, we still need to get stuff from one place to another. Intact. Unbroken. Usable.

That's why GSA has a whole assortment of shipping containers in different sizes and shapes for sending documents, circuit boards, amplifiers, graphics, computer disks, or almost anything you want. Because when you send something intact, you want it delivered intact.

For a complete listing, see the Customer Supply Catalog under Mailing and Packing Supplies.

**REMANUFACTURED TONER CARTRIDGES — DO THE RIGHT THING AND SAVE MONEY TOO!**

Remanufactured Toner Cartridges give you more than just a product. They give you the opportunity to save the environment a little, each time you buy one. Just by purchasing remanufactured, you cut down on the dumping of toxic waste into our landfills. They also provide a warranted product whose quality you can depend on. Remanufactured toner cartridges save on production costs by recycling used cartridges and those savings are passed on to you. It's easy to

be in compliance with EPA guidelines and E.O.V. 13101 when you buy remanufactured toner cartridges.

The companies below provide high quality remanufactured cartridges under Multiple Award Schedule 75.II.A Office Products and Services, look for them on [www.gsaAdvantage.gov](http://www.gsaAdvantage.gov):

**BEFORE THE GOING GETS ROUGH, GO TO GSA**

We can't predict emergencies. We can only plan for them—and they can happen any time: forest fires, floods, hurricanes, and tornadoes, especially during the warmer months. That's why your agency always needs to be prepared. So stock up on emergency supplies now. Because at any hour, Federal agencies under the guidance of FEMA might need to step in and lend a hand. And that's when GSA is there to lend you a hand. But don't wait to place an order. Because sometimes after an emergency is a little too late to stock up on what you need.

**Plastic Bags**

There is nothing worse than not having the right plastic bags when you need them. Or one that's less than the best, when you have to contain a lot of sloppy trash. Or just about anything else you might need to contain. Which you might have after a major disaster. But whatever your disposal needs are, you can get the right bag for the right purpose, with exactly the strength requirements you need. So when you use bags from FSS, you know that what goes into the bag stays in the bag. And that means quality you can rely on...at a price your budget can afford. **Premium quality with Heavy Duty rating with good puncture resistance for dry or dry/wet trash. 75 lb Load Capacity. U/I BX.** Check the GSA Supply Catalog 2001 Pgs 382-384 for a complete line.

<u>NSN</u>	<u>Size</u>	<u>Capacity</u>	<u>Color</u>	<u>Qty.</u>	<u>Price</u>
8105-01-183-9769	39 x 33"	33 gal	Dk. brn. or grn.	125	\$26.74
8105-01-150-6256	44 x 32"	34 gal	Clear	125	\$23.85
8105-01-183-9764	58 x 36"	57 gal	Dk. brn. or grn.	100	\$21.16
8105-00-759-0794	65 x 38"	71 gal	Clear	50	\$14.43
8105-00-145-0163	57 x 69"	125 gal	Clear	100	\$35.62

**Fiberboard Boxes**

All the reusable, corrugated, weather-resistant, fiberboard boxes you need to get equipment to the field safely or for storage of equipment ready to ship at a moment's notice. A vast array of boxes for holding serviceable and repairable items, meters, gauges, circuit boards, electronic modules and tubes, receiver-transmitters, amplifiers, power supply units, electronic indicators, control generators, and amplifiers. We have too many to list here, because we have one for just about anything you need to ship. Available in a range of shapes and sizes. Check the GSA Supply Catalog 2001 Pg.125 for a complete line.

**Packaging Material**

Check the GSA Supply Catalog 2001 for a complete line on all the packaging supplies you need to get your equipment and materials out to the field in good condition, including packing tape (dozens of different kinds, widths, and colors, so the stuff inside the boxes stays inside) see pgs 120-121, tape dispensers (so you're not always biting tape off with your teeth) see pg 138, and shipping tags (so the people who get the stuff will know what's inside) see pgs. 111-112.

**Barrier Material**

After a hurricane, it might be the best roof over someone's head that you can get up in a hurry...or lining material for waterproofing...or protection of equipment from dust and rain...or ground covering for emergency shelters...or a wind break in an open field...or dozens of other uses. Greaseproof, waterproof, acid free, and noncorrosive. U/I RO (200YD) 36" wide Check the GSA Supply Catalog 2001 Pgs. 120-121 for a complete line.

<u>NSN</u>	<u>Color</u>	<u>Price</u>

## BEFORE THE GOING GETS ROUGH, GO TO GSA (CONT'D.)

**Arch Board File*****Your desk in the field! Stay organized in the midst of chaos!***

Like a clipboard, but more secure. Composition hardboard file protects documents. Two arched prongs with locking device hold paper securely. Prongs are spaced 2-3/4" apart. Has a 2-1/2" capacity, and includes a hole for hanging. Includes perforator, punched alphabetical index and pressboard cover that keeps pages flat in windy conditions. Perforator punches 1/4" holes to fit arch. Index is printed on manila cards. U/I EA. Check the GSA Supply Catalog 2001 Pg 83 for a complete line.

<u>NSN</u>	<u>Size</u>	<u>Price</u>
7520-00-240-5498	9 x 17"	\$6.73

**Marking Pens (Write On/Wipe Off)**

Just what you want for posting information at command centers when information is constantly changing, or for on-site organizational meetings. Set of four tube-type markers (black, blue, green, and red) writes on nonporous boards and wipes off with a tissue or dry cloth. Ink is indelible on porous surfaces and will bleed through paper. Fine point, nonrefillable. SE (4 Markers)

<u>NSN</u>	<u>Price</u>
7520-01-156-1411	\$2.09

**Unipaint Markers**

***Just the thing for marking on rescue equipment!*** You have to try these to believe them--these markers write on almost any surface. Its secret is a quick-drying oil-based paint in a pen style marker, giving maximum neatness and control for marking on opaque or glossy surfaces with a medium line. Set of six markers (black, blue, green, red, white, yellow) for lettering, color coding, and marking on metal, wood, glass, paper, and plastic. SE (6 Markers).

<u>NSN</u>	<u>U/I</u>	<u>Price</u>
7520-01-439-3409	Set (6)	\$9.48
7520-01-439-3410	Set (12)	\$18.73

Manufactured by mark-tex corporation.  
Supplied by Adams Marketing, a woman owned business.

### GSA Schedule 871 Professional Engineering Services

## SMALL BUSINESS TAKES PRIDE IN SUPPORTING PENTAGON RENOVATION

When the Information Management and Telecommunications (IM&T) Project Office of the Pentagon Renovation Program needed immediate support to include project operations and administration, resource management planning and execution, and personnel and manpower administration, it called upon GSA for assistance in securing the appropriate support team.

DECISIVE ANALYTICS Corporation (DAC), a small employee-owned company headquartered in Arlington VA, provided a technical and cost proposal to GSA within a few days of receiving the request for quote. DAC's management plan and pricing were determined to be the best value.

Once awarded, DAC provided 3 professional support personnel to the IM&T Project Office for the Pentagon Renovation Program within one week. According to Kelly McClelland, DAC's Director of Contracts, "The GSA Federal Supply Schedule enabled the Government to secure the professional engineering support needed in an efficient, timely manner. Our GSA Professional Engineering Services rates have already been determined by GSA to be fair and reasonable, so it was not necessary for the Government to go through the long formal procurement process again to get the services it needed".

Since the start of the contract, DAC personnel have become integral members of the fast-paced Pentagon Renovation IM&T team and have contributed to the success of the program. Since the 11 September 2001 attack there has been a renewed spirit and focus by all Pentagon Renovation employees to rebuild those parts of the Pentagon destroyed in the attack as well as carry on with the original mission of renovating the entire Pentagon.

Immediately after the attack everyone, including the DAC employees, ceased what they had been working on and did what they could to assist in rescue and recovery operations, regardless of their role or responsibility in the program. Pre-11 Sept 01 roles and responsibilities were forgotten and everyone immediately drew together and turned to the task of helping the Pentagon Renovation office mobilize for rescue and recovery operations. This became a 24 hour effort, seven days a week for weeks after the attack. There was no let-up in the effort. Some manned crisis reaction cells, some acted as liaisons with other DoD and Federal agencies, and many others worked at the attack site with other rescue and recovery agencies and organizations. Everyone dropped what they were doing and vigorously contributed to the rescue effort. While everyone was understandably angry and upset at the devastation and destruction wrought by the attack, the mood throughout the program was marked by a steadfast resolve and determination to provide whatever support and assistance was necessary to rescue and recovery organizations.

**GSA Schedule 871  
Professional Engineering Services**

**SMALL BUSINESS TAKES PRIDE IN SUPPORTING  
PENTAGON RENOVATION (CONT'D.)**

In addition to the rebuilding efforts on those parts of the Pentagon destroyed in the attack, the original schedule of completing the entire renovation project by December 2012 will remain in tact. Though the destroyed portion of the Pentagon, now aptly called the Phoenix Project to signify a rising from the ashes, will now be rolled into the overall renovation schedule, the Program goal is to make up for this lost time and complete the renovation on schedule. The Army Corps of Engineers expects to dedicate a memorial at the crash site on September 11, 2002, the one-year anniversary of the attack and have people occupying their E-ring offices adjacent to the crash site so that they may observe the ceremony from their office windows.

Decisive Analytics Corporation is tremendously proud to be part of the IM&T team of the Pentagon Renovation project and particularly proud to have been able to contribute to recovery efforts following the 11 Sept attack. As stated earlier, the attack brought a renewed focus and spirit to the renovation program and increased the sense of purpose and accomplishment among all its employees. While the attack temporarily shifted attention from the renovation to rescue, recovery and restoration, all efforts are, again, centered on the task at hand, renovation and rebuilding – renovating those parts of the Pentagon untouched by the 11 September attack and rebuilding that part of the Pentagon destroyed in the attack. It is this spirit and pride that so tightly unites the government employees and contractors of the Pentagon Renovation team. As DAC President, John Donnellon states "Although we have a number of clients for our engineering services in both the commercial and government sectors, after September 11th we look upon the Pentagon Renovation effort as our highest priority to show America's resolve in combating terrorism." There can be no better message conveyed to the

American public than to show, by example, a rebuilt and renovated Pentagon completed on schedule. As the Program Director, Lee Evey, states "from the ashes of the worst act of terrorism on American soil, a safer and stronger Pentagon will rise."

## GSA Schedule 69 Training Aids and Devices

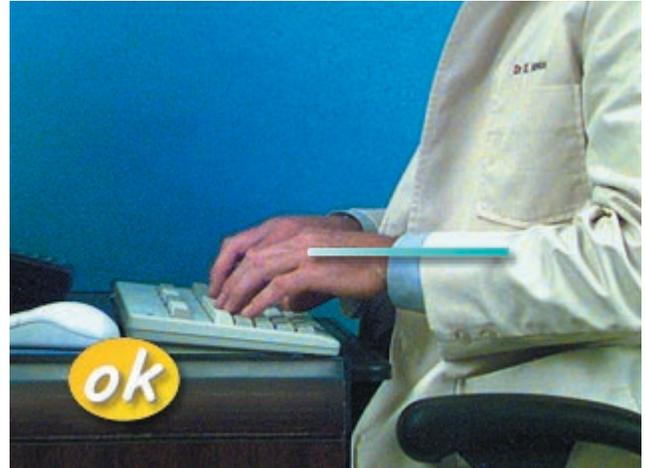

### ERGO CLINIC GIVES ERGONOMIC TRAINING RIGHT AT YOUR WORKSTATION

*The Ergo Clinic® is an effective and inexpensive solution for reducing cumulative/repetitive injuries in today's government offices.*

The Ergo Clinic is a computer-based training program developed by CorpMed.com's occupational health physicians. The program delivers interactive ergonomic training and self-help information over agency intranets. Using their browser software (i.e. Microsoft Internet Explorer® or Netscape Navigator®), employees can evaluate and adjust their existing equipment by following on-screen instructions and illustrations.

Cumulative/repetitive injuries (also called musculo-skeletal injuries) comprise the majority of Workers' Compensation costs to government agencies today. Furthermore, *reported* injuries are only the tip of the iceberg. In a study of 13,000 federal office workers, it was discovered that over half had experienced significant pain during the previous year. Fortunately, essentially all of these injuries are preventable with proactive training and intervention.

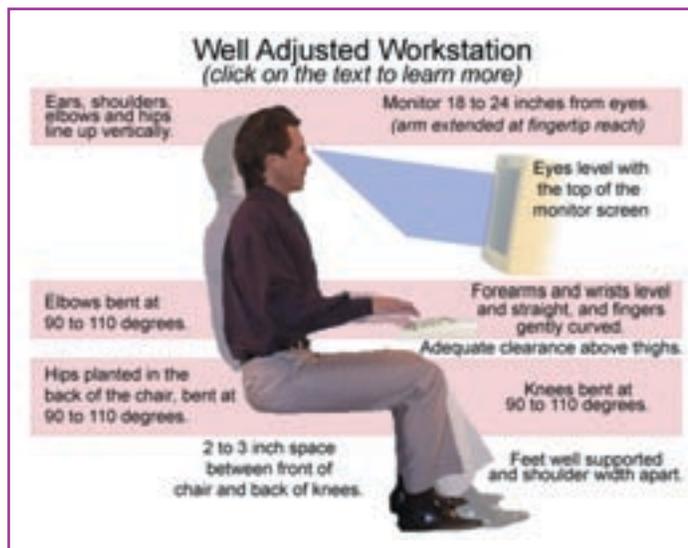

Very few employees work with a correctly adjusted chair, keyboard and monitor. The result is a large and growing number of cumulative/repetitive injuries. Federal expenditures last year were over \$130 million for carpal tunnel syndrome alone (US Dept of Labor).

The solution for the epidemic in ergonomic disorders is not to replace office equipment. Rather, it is to carefully instruct employees on the correct position and use of their existing workstations. In addition, they must learn how to adopt healthy posture and techniques for keyboarding and mousing. By hosting the Ergo Clinic® over government intranets, CorpMed.com provides an effective and inexpensive solution. The cost for larger agencies falls as low as a few dollars per employee for unlimited access.

While at his or her workstation, the employee links to the Ergo Clinic training at a convenient time and completes it at his or her own pace. Within 30-minutes, employees have not only learned essential information but also correctly adjusted their workstations to their different body sizes and job tasks. Of thousands of Ergo Clinic users, over 85% have indicated that they are more comfortable as a result of the program.

Web-based training eliminates travel, office disruption and the scheduling difficulties associated with group presentations or individual evaluations. Furthermore, the interactive nature of the instruction engenders a sense of control and responsibility for one's work environment. This advantage over traditional training methods is key to reducing Workers' Compensation costs and liability.

## GSA Schedule 69 Training Aids and Devices

### ERGO CLINIC GIVES ERGONOMIC TRAINING RIGHT AT YOUR WORKSTATION (CONT'D.)

CorpMed.com's Ergo Clinic also includes the following features, each available 24/7:

- A "Self Care" section for troubleshooting the likely cause of discomfort in various parts of the body, from eye fatigue to low back pain. Practical solutions are provided, including specific stretching exercises, posture tips and suggestions for repositioning equipment.
- "Quick Guide" reference information, such as how to correctly position a chair, keyboard, monitor and accessories.
- Customization of the site by inserting the agency's logo, address and ergonomic contact person onto the Clinic's home page, and the provision of either a 30 minute or 2 hour training version. Additionally, agency specific information can be inserted into the training, such as announcements, policies and procedures for ergonomics.
- Optional features include quizzes, a discomfort survey, follow-up survey, and laptop and call center ergonomics.
- The tracking feature permits documentation of those employees who have begun or completed the training; the ergonomic problems that were identified on self-assessment; and the improvements in workstation adjustment and comfort level over time.
- Report generation includes a listing of employees in each department who are at high risk for injury. The Ergo Clinic then provides a list of email addresses to facilitate ensuring that these employees do not need additional assistance.

Because CorpMed.com hosts and maintains this web-based program, technical requirements are limited to browsers and intranet connections. IT departments simply link to the site, maintaining network security. No installation of software or plug-ins is required. Monthly upgrades to the Ergo Clinic are included with the annual subscription.

In addition to the office edition, Ergo Clinic programs have been designed for material handlers in shipping/receiving (lifting and bending), laboratory workers (microscope and pipette work), and hospital employees who lift and transfer patients.

Since 1997, CorpMed.com's Ergo Clinic has proven its effectiveness in training employees and making them more comfortable and productive.

Federal Supply Schedule 75 II A  
Office Products & Services

**THE NAME SAYS IT ALL:  
RECYCLED OFFICE PRODUCTS, INC.**

This company features a variety of items that are environmentally friendly. Here you can order items that might otherwise be overlooked as an opportunity to green the office paraphernalia. Plastic desk accessories such as in/out boxes, desktop file holders, drawer organizers are all 25% post consumer recycled plastic. They offer steel (recycled) desk-top organizers as well. You can even find paper clips that have a recycled content (25% steel). Compressed air duster cans are 100% ozone safe. The company also carries rechargeable batteries that can be used 25 times or more. They have solvent free correction pens and environmentally safe correction fluid. Newly available are 100% recycled, chlorine free papers, calendars and appointment books. This company's products speak for themselves. Their products are the statement of an environmentally proactive organization.
