Calculators

Need help choosing a new calculator? This buying guide shows the basic calculator functions for some GSA Global Supply selections.

A calculator makes work more efficient and gives you a needed edge in an increasingly demanding workplace. Think how convenient it would be to have one at your fingertips. Using a calculator can be easier than working with the one on your computer. There's no need to find the program, maybe even download it, and then open it before performing a simple task. GSA has a wide range of calculators available to fit your needs, demands and work style.

Although as early as 4,000 BCE (Before Common Era) pens made of hollow reeds or straws that supported a column of liquid were being used, it was not until 1888 that the ballpoint pen was patented by John J. Loud to mark leather fabrics. However, the ballpoint pen received little attention until the Second World War when pilots began using them since at high altitudes they did not leak, as did other pens. The Reynolds Pen, that sold for \$10 in 1945 and had the slogan "It writes underwater," was the ballpoint pen that did much to replace the previously popular fountain pen. Creator Milton Reynolds produced a great deal of publicity for his product by flying around the world in 1947 and handing them out.

Calendars/Planners – New 2004 Stock Numbers

Is there one day in the past year when you didn't use your pocket or desk planner? The fact is, you don't just use your planner now and then; you use it all the time. It's a tool. A reminder. A record. A way to plan your time when time is something you can't afford to waste.

Whatever your style, whether you prefer a calendar blotter pad, to Franklin Covey and Dayrunner Planners that you can customize with a variety of inserts, we have the planner that best fits your needs. Check out the table below to match the calendar that you use to the new 2004 National Stock Numbers.
